

WorkSafe
eyewear

2016 CATALOGUE

What we do

We provide Prescription Safety Glasses for people engaged in a wide range of industries that include, mining, agribusiness, manufacturing and utilities.

Our prescription safety Eyewear offers your patients stylish, comfortable eyewear that optimises vision and provides a high level of eye protection.

WorkSafe Eyewear prescription safety glasses are certified by SAI Global and are made to comply with AS/NZS1337.6:2012

Supporting Independent Optometrists

We partner with local optometrists to help supply their patients with the latest prescription safety frames and lenses. We understand the importance of the role played by the local eye care professional in providing the best prescription safety eyewear and eye care to local workers.

Only you know the best prescription and type of lens for your patients. We believe that your patients obtain maximum benefit by having you, fit and deliver their Rx safety eyewear.

Our system is designed to make prescribing and dispensing Rx safety eyewear easy, efficient and profitable for you.

About Us

WorkSafe Eyewear has been providing Australian workers with the highest quality prescription safety glasses since 2001. The eyewear is manufactured in our SAI -Global approved Sydney Laboratory. We use tried and tested frame and lens designs that offer excellent vision and fast adaptation for your patients. We use only polycarbonate and Trilogy or Phoenix solvent resistant lens materials. All of our Rx safety eyewear is made to ensure compliance with AS/NZ1337.6: 2012 and Optical Standard AS/NZS ISO 21987

WSE SAI licence # is SMK25379

WorkSafe Prescription Safety Glasses

WorkSafe safety glasses are made to comfortable, safe and able to stand up to the toughest work environments. For uncompromised quality and good level of vision protection count on *WorkSafe* Eyewear

How to order

Our order Process is simple, after examining your patient and determining best Rx and lens type, you then select a frame that offers good eye coverage. Send the order details to us via online order, fax or phone. We then make up the order and express post back to you certified Rx Safety glasses.

Ordering Prescription Safety Eyewear

1. All frames come in a 6-8 piece display kit, priced and clearly labelled.
2. Select best fitting frame offering good eye coverage
3. Online order, Fax or Email to us with prescription and frame details

That's all we need to get started on your new safety glasses order.

*Your loan kit requires a deposit of \$198. You may return your kit for a full refund at any stage. Order 24 or more pairs of *WorkSafe* Eyewear Rx Safety Glasses and the kit is yours to keep

***WorkSafe* Eyewear is only available through Independent optometrists and is not sold online.**

FRAME MODEL	COLOURS	MATERIAL
UVEX METEOR	Grey 	Plastic

EYESIZE	BRIDGE	LENS POWER RANGE
58mm	20mm	+6.00 to -6.00 /-4.00cyl

Polycarbonate or Trilogy?

While both Polycarbonate and Trilogy/Phoenix lenses offer adequate eye protection for medium impact in accordance with AS/NZS/1337.6 :2012, Polycarbonate does have the distinct advantage of being able to withstand a much higher velocity impact than Trilogy before breaking. It also costs a bit less and comes in a wider range of lens styles.

Trilogy/Phoenix material however, is more optically stable giving the wearer greater optical clarity than Polycarbonate. Most importantly Trilogy/Phoenix is relatively unaffected by contact with solvents and even resists highly corrosive liquids including ammonia and hydraulic fluids. If you think your patient's safety glasses will come in contact with any solvents then Trilogy lens material may be the best option.

Local Laboratory

Virtually all of our safety glasses are made by *WorkSafe Eyewear* optical mechanics in our own Sydney fitting lab. Each pair of *WorkSafe Eyewear* safety glasses undergoes rigorous checking and Q.C. documentation. This process works to ensure that your safety glasses are accurate and offer high level of eye protection.

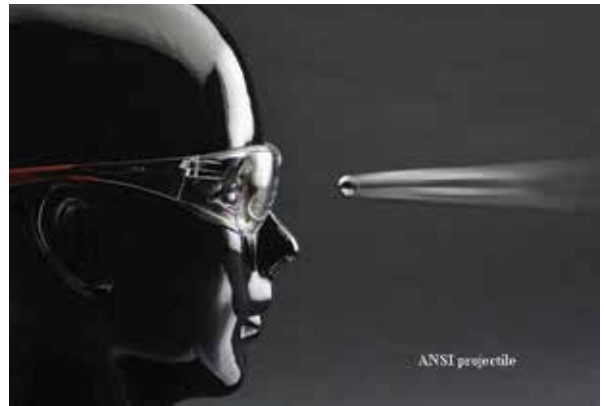

Our manufacturing standards ensure that all glasses meet with Medium Impact Standard AS/NZS 1337.6:2012 and Optical Standard AS/NZS ISO 21987

WorkSafe Eyewear's Guarantee

As part of our Guarantee we offer:

- 12 months full manufacturer's warranty on frames and lenses.
- Full Credit if not satisfied with your glasses within 2 months of delivery.
- Ongoing after sales service and technical support.

Why Certified Safety?

Not all personal safety items are subject mandatory standards. That is why it is essential that you should look for suppliers that carry an approved symbol like the “Five Ticks” when ordering prescription safety glasses.

Using a SAI Global certified laboratory like *WorkSafe Eyewear* is the best way to safeguard your patients’ vision and also offers you peace of mind in knowing you are providing a high level of eye protection to your patients.

SAI Global’s well-known Standards Mark™ is a globally recognized certification mark for personal protective equipment.

The Five Ticks Standards Mark™ logo provides assurance to Optometrists and patients that their eyewear has met safety and optical criteria set by Australian Standards.

WorkSafe Eyewear SAI Global Licence is SMKH25679

Progressive Lens Technology

INFINITY
A NEW
FREEDOM

Infinity is a German progressive that gives you freedom to adjust the progression zone area. E.g. Set maximum distance area for drivers and machine operators or create a bigger “near” area for office workers. All done on a sliding scale – very useful for matching best lens to suit your patient’s visual needs.
